Education

Cornell University

Ithaca, NY

BACHELOR OF ARTS IN COMPUTER SCIENCE

Expected May 2022

- Relevant Coursework: OOP & Data Structures, Functional Programming, Analysis of Algorithms, Discrete Structures, Database Systems, Linear Algebra, Programming Languages & Logics, Operating Systems, Embedded Systems, Computer Networks, System Security*, Machine Learning* (* = planned)

Experience

Capital One

McLean, VA

SOFTWARE ENGINEER INTERN

Jun. 2021 - Aug. 2021

- Created unsupervised learning models using Python to help identify profiles/clusters of users to accelerate offer acceptance and engagement for business
- Improved the CreditWise team's understanding of features impacting offer acceptance rate and provided team with recommendations of new features to segment users
- Analyzed ~2 million rows (consisting of over 50 features) of credit-related data on Snowflake using SQL to train ML models

Cornell Design & Tech Initiative

Ithaca, NY

SOFTWARE DEVELOPER

Oct. 2019 - May 2021

- Worked on Rider, a ride-share app for students with disabilities on campus, with a team of designers, product managers, and developers
- Implement a responsive and accessible frontend for the iOS and Android app with Flutter, while following the Git branching and CI/CD workflow
- Built reusable widgets, implemented push notifications, and integrated REST APIs with the frontend of the app

Cornell University

Ithaca, NY

TEACHING ASSISTANT

Jan. 2021 - Current

- Hold office hours and grade assignments for students
- Spring 2021 - Current: Functional Programming (400+ students)
- Summer 2021: Analysis of Algorithms (40+ students)

Projects

lang

OCAML

Oct. 2020 - Dec. 2020

- An interpreter and static type checker for my own functional programming language *lang*
- This language includes a small standard library, module system, pattern matching, and custom user-defined data types

Moody

REACT NATIVE (TYPESCRIPT)

Aug. 2020

- An iOS and Android tracker app meant for users to track and reflect on their emotions, as well as provide encouragement for users
- Integrated Google Dialogflow to create a Chatbot that sends encouraging quotes and memes based on users' mood
- Placed top 3 for the hackathon's Mental Health category

mediaRec

REACT, FLASK, PYTHON

Jul. 2020. - Aug. 2020

- Develop a webapp that provides movie and song recommendations based on user preferences using Spotify API and TMDb API
- Implement recommendation algorithm/logic using Flask, with a frontend created with React

Oscrabble

OCAML

Mar. 2020. - May. 2020

- A functional implementation of the board game Scrabble with local multiplayer, developed as my final project submission for CS 3110
- Implemented word checking logic using a Trie for word verification and a scoring system that manages each player's score

Skills

Languages Java, OCaml, Python, JavaScript, TypeScript, Dart, C, HTML/CSS

Technologies and Tools Android Studio, Flutter, React, React Native, Git, Node.js, Firebase, Express, PostgreSQL, scikit-learn

Awards Tanner Dean's Scholar
